

Chaudhary Sohaib Kamal

Islamabad, Pakistan ✉ cskamal19004@gmail.com ☎ +92 3160195565 🌐 <https://www.linkedin.com/in/sohaibkamal/>

SUMMARY

Software Engineer specializing in full-stack JavaScript development with experience building scalable SaaS applications using Next.js, Node.js, MongoDB, Prisma, React Native, and Flutter. Experienced in developing multi-tenant systems, integrating third-party APIs, and delivering end-to-end web and mobile solutions.

EXPERIENCE

Technical Lead

Fyntryx Solutions

Dec 2025 - Present, Islamabad

- Directed the technical roadmap for the Crisp Cleaning platform, expanding the initial project scope from a static lead-generation site into a comprehensive, multi-tenant operational management system.
- Collaborated directly with international stakeholders to define business requirements, architecting complex logic such as custom customer reward tiers and timezone-aware scheduling (accommodating Daylight Saving Time).
- Engineered the full development lifecycle, ensuring seamless integration between client requirements, system architecture, and final deployment.

Full Stack Developer

Fyntryx Solutions

Sep 2025 - Nov 2025, Islamabad

- Architected a robust backend utilizing Node.js, MongoDB, and Prisma to power three distinct role-based interfaces (Admin, Customer, and Cleaner dashboards) for job tracking, assignments, and secure payouts.
- Migrated the initial React architecture to Next.js, significantly improving site performance and SEO while building a responsive, high-conversion frontend.
- Integrated third-party APIs to handle complex platform features, including Stripe for automated payment processing and Geoapify for precise, location-based service routing.

Data Analyst Intern

Systems Ltd

June 2025 - July 2025, Islamabad

- Built scalable data warehouses and streamlined automated ETL workflows using Power BI, SQL, and DAX to deliver accurate business intelligence dashboards for enterprise clients.

PROJECTS

DermaVista: Edge-AI Diagnostic System | Flutter, TensorFlow Lite, Python

- Engineered a 100% offline edge-computing AI system using a quantized MobileNetV3 CNN, executing heavy 4D tensor mathematics on background Dart Isolates to prevent main-thread UI blocking.
- Resolved critical Android GPU memory exhaustion and OOM crashes during inference by designing custom camera lifecycle hooks to flush hardware buffers.
- Developed a deterministic Clinical Rules Engine that aggregates raw AI probabilities with patient anamnesis data, building a Pre-Inference Gatekeeper using Google ML Kit to intercept invalid imagery and ensure clinical safety.

EDUCATION

B.S. Software Engineering • National University of Modern Languages • Islamabad, Pakistan • 2027 • 3.61

CERTIFICATIONS

Full Stack JavaScript Developer Professional Certificate IBM • 2025

React Native Specialization Meta • 2025

SKILLS

- Programming Languages:** JavaScript, TypeScript, Dart, C++, Java
- Frontend & Web:** React, Next.js, HTML5, CSS3
- Backend & APIs:** Node.js, Express, Prisma, RESTful API Design, Stripe, Geoapify
- Mobile & Cross-Platform:** React Native, Flutter, TensorFlow Lite (TFLite)
- Databases:** MongoDB, SQL, NoSQL
- Version Control & Analytics:** Vercel, Git, GitHub, Power BI, Power Query, DAX
